DETAILED ACTION

Allowable Subject Matter

1. Claims 5 – 13 renumbered 1 – 9 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art made of record, in single or in combination, fails to disclose explicitly the limitations of:

“first relaying apparatuses, with one or more virtual routers each of which is associated with a VPN-ID and a multicast address in a table, generating and multicasting control packets each of which contains a source address of each virtual router and is transmitted for the multicast address assigned as a destination address corresponding to the VPN-ID of each virtual router, and second relaying apparatuses, with one or more virtual routers each of which is associated with a VPN-ID and a multicast address in a table, accepting only the control packets of the multicast address corresponding to the VPN-ID of each virtual router of the second relaying apparatuses, establishing virtual links using the source address in the control packets with the first relaying apparatuses and returning reply packets to the first relaying apparatuses through the virtual links, whereby the virtual private network is constructed between the virtual routers that are specific to a same multicast address in the first and the second relaying apparatuses, with the virtual links established between all pairs of the virtual routers and with virtual interfaces receiving packets from outside the public data communication network” as disclosed in claim 5.

“virtual routers each of which is preliminarily associated with a VPN-ID and a multicast address in a table, a packet unit generating and multicasting control packets each of which contains a source address of each virtual router and is transmitted for the

Art Unit: 2419

multicast address as a destination address corresponding to the VPN-ID of each virtual router, and a link unit accepting only the control packets of the multicast address corresponding to the VPN-ID of each virtual router of one or more other relaying apparatuses, establishing virtual links using the source address in the control packets with the one or more other relaying apparatuses which are transmitting sources of the control packets and returning reply packets to the one or more other relaying apparatuses through the virtual links, whereby the virtual private network is constructed between the virtual relaying routers that are specific to a same multicast address, with the unicast virtual links established between all pairs of the virtual routers, and with virtual interfaces receiving packets from outside the public data communication network” as disclosed in claim 9.

3. Additionally, all of the further limitations in claims 6, 7, 8, 10, 11, 12, 13 are allowable since the claims are dependent upon independent claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
